

Aim:

Write C program to insert and delete the element of one dimensional array

Source Code:array.c

```
#include<stdio.h>
int main()
{
    int a[15],i,n,pos,new;
    printf("Enter the size of the array: ");
    scanf("%d",&n);
    printf("Enter the elements of the array:\n");
    for(i=0;i<n;i++)
        scanf("%d",&a[i]);
    printf("Enter the position where you want to insert an element: ");
    scanf("%d",&pos);
    printf("Enter the value to insert: ");
    scanf("%d",&new);
    for(i=n-1;i>=pos;i--)
        a[i+1]=a[i];
    a[pos]=new;
    printf("Element inserted successfully!\n");
    printf("Enter the position of the element you want to delete: ");
    scanf("%d",&pos);
    for(i=pos;i<=n;i++)
        a[i]=a[i+1];
    printf("Element deleted successfully!\n");
    printf("Updated array:\n");
    for(i=0;i<n;i++)
        printf("%d ",a[i]);
    printf("\n");
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Enter the size of the array: 4
Enter the elements of the array: 1 5 2 3
Enter the position where you want to insert an element: 2
Enter the value to insert: 11
Element inserted successfully! 4
Enter the position of the element you want to delete: 4
Element deleted successfully!
Updated array:
1 5 11 2

Test Case - 2
User Output
Enter the size of the array: 7
Enter the elements of the array: 11 22 33 44 55 66 77
Enter the position where you want to insert an element: 1
Enter the value to insert: 88
Element inserted successfully! 7
Enter the position of the element you want to delete: 7
Element deleted successfully!
Updated array:
11 88 22 33 44 55 66
